AS Staff Retirements

Two longtime Access Services staff members, Sandy Japikse and Susan O'Boyle, have recently retired, leaving us with holes not only in our staff operations but also in our hearts. We wish both of these fantastic ladies well as they pursue other adventures.

Together these ladies worked nearly 70 years for the Fairfax County Public Library. Susan O'Boyle worked 29 years for the library system, the last nine for Access Services. Many of our customers have benefitted from her endless knowledge of popular mystery and romance writers. All of us have benefitted from her love of books and inexhaustible enthusiasm.

As wonderful as Susan has been, Sandy may have an even more impressive history. She worked for the library for 39 years, 37 with Access Services. Sandy journeyed with Access Services as it has traveled around the county from John Marshall Community Library to Sherwood Hall Regional Library to our current location at the Fairfax County Government Center. She endured the name change from Special Services to Access Services. Sandy was the liaison with the Fairfax County Public Schools and our proofreader extraordinaire.

As the retirement dates loomed closer, I asked each lady what they would be doing. Sandy responded, with her characteristic smile, that the first thing she had to do was clean her house. She also looked forward to enjoying her grandchildren in their academic, sports and theatrical activities. She hoped to do some traveling, perhaps by train, perhaps out to Salt Lake City for some ancestry research. Susan also has grandchildren and she will spend more time with them. She planned to enjoy staying in bed on weekday mornings and attending more Nationals baseball games. They were both glad not to worry about winter driving!

These wonderful ladies will be missed but we are sure that their many new journeys will be filled with laughter, smiles and joy. Come back and visit us any time!

The Never-Ending Value of Support Groups

By Gloria Sussman (assisted by Nancy Riley)

Over the years, the concept of self-help has grown tremendously. In the world of the visually impaired, the need to be understood and to seek help for our singular problems has been uppermost in many of our minds.
In the early 1980’s, after I could no longer read regular print, my husband would drive me to the Special Services library in Alexandria (Fairfax County) to help me select Talking Books and to chat with the branch manager and her one assistant about library services. She had observed that there were quite a few customers of that branch, now called Access Services, who would like to explore the kinds of help which would be available to them. We quickly decided to meet on a regular basis. There were so many things to learn! An invitation was extended to all visually impaired persons who used the Talking Books service. And so a support group was born.

It was decided that regularly scheduled gatherings would be the most effective way for our members to receive and exchange information.

For example, meetings could provide updates on the latest advances in adaptive technology. From hand-held magnifiers to the most sophisticated computers, technology has proved to play a vital role in enabling the visually impaired community to maintain independence. With the advent of the electronic magnifier (CCTV), all kinds of printed material could be read. Today, there are machines which not only magnify the words but also speak them. Vendors are frequently invited to attend meetings and to demonstrate their products.

In addition, a wide variety of pertinent subjects have been explored at our meetings. Over the years we have been given good insight into solutions for our daily needs by professionals such as retinal specialists, low vision optometrists, occupational therapists, transportation providers and representatives from reading services. We have also heard about individuals’ personal journeys in dealing with their own vision loss.

We are grateful for the many organizations in this area which supply us valuable information about living a fuller life. And now, in the digital age, we have many more ways to keep up with our peers. To be able to share our concerns and find solutions to our immediate problems is a great reason to be a part of a support group.

Editor’s Note:
The Fairfax County Public Library assists and facilitates support groups in Vienna and Reston. They are called VIP (Visually Impaired Persons) and they always welcome new members. The support group in Reston meets at the Reston Regional Library on the first Friday of most months from 2:00 p.m. until 4:00 p.m. and the support group in Vienna meets at the Patrick Henry Community Library on the third Monday from 10:00 a.m. until 12:00 p.m. NOTE: Both groups do not meet in the summer months. Call Access Services for more information at (703) 324-8380.

AS Friends Meeting

Mark your calendars now. You are invited to attend the next Friends of Access Services Friends meeting on Thursday, April 28. The meeting will be held in rooms 9/10 of the Government Center and will begin at 1:00 p.m. All are invited as this is an open meeting. Come join us!

High Volume Digital Talking Book Machine

NLS has developed a high-volume version of the digital talking-book machine (DTBM) for use by patrons who are hearing impaired. The high-volume player, which is paired with a headset, is available as a standard or advanced (DS-1/DA-1) model that has been programmed to have an amplified volume up to 120 decibels. It can be issued only by NLS and will bear a warning label. The high-volume feature only works with the set of stereo headphones that NLS provides. The pairing replaces the amplifier/headset accessory.

To receive a high-volume player and headset, a patron must provide certification of hearing impairment by a physician or audiologist. An agency may assist an eligible patron with obtaining a high-volume player and headset by downloading a high-volume player application from the following link: High-volume player application and returning the patron’s completed and fully signed application to the NLS.
PLEASE NOTE: We have just received the notification about these machines at the end of March 2016 and we are not sure when they will be available for our customers. Please call us at the general telephone number for Access Services, 703-324-8380, to find out more information about this expanded service.

Keeping You Reading, Keeping You Informed

We strive to get you the material that YOU want to read. If you are getting too many books or not enough books or the books you are receiving are not to your liking please call us and let us know. The general Access Services telephone number is 703-324-8380.

You may have noticed that some book titles are preceded with an additional letter, DBC, rather than just DB and wondered what that meant. A book number beginning with DBC has been digitally recorded by a regional or local library (Not the National Library Service). These titles have met the quality standards of the NLS but are generally titles that reflect the locality where they have been recorded.

Income Tax Information or Assistance

There are many sites throughout Fairfax County where people can receive FREE Income Tax Preparation. If you worked and earned less than $54,000 then you may qualify. Please call AS at 703-324-8380 for the locations and their hours of service before April 15. Information is also available at the following website: www.nvcash.org.
